

# Greening the Healthcare Sector Forum

Friday 15th September 1:45pm approx AWST

## Fiona Stanley Hospital Central Energy Plant (CEP)

Come inside the Central Energy Plant (CEP) which is the 'beating heart' of Fiona Stanley Hospital. The CEP provides 70% of the site's energy and houses the reverse osmosis water plant, chillers and emergency generators.

60 mins

Maximum participants: 10

Fully enclosed, flat-soled, non-slip shoes required

## Fiona Stanley Hospital Waste Management Service

More than 2,500 tonnes of waste passes through the FSH waste dock each year – this includes more than 10 specialist recycling streams, co-mingled recycling and general waste. Join this tour to see how the FSH waste team manages this huge volume of waste in one WA's largest and busiest hospitals.

60 mins

Maximum participants: 10

## Noongar Art and Garden Walking Tour

Fiona Stanley Hospital stands on Beeliar Boodja, which holds great cultural significance for Noongar people. Join this walk around the campus to see the many significant Noongar artworks across the site and get to know some of the important flora and fauna of the area.

60 mins

Maximum participants: 20

Bring a hat and some water

## St John of God Murdoch Hospital

A guided tour of the waste management system at St John of God Murdoch Hospital. This hospital is the benchmark for waste management within St John of God Health Care across the nation.

45 mins

Maximum participants: 10

## Linen services Australia

A guided tour of the largest commercial laundry in WA. Linen is the most recycled product in the health care system. See our water recycling plant and how the LSA team manages 30 tonnes of linen each week for public and private health across WA. See our specialist healthcare products in action.

60 mins

Maximum participants: 20

Closed in shoes required, transport will be arranged.
